Ivor Searle has expanded its transmission portfolio with the addition of a six-speed manual gearbox for the Vauxhall Corsa and Peugeot 208. The new units cater specifically to 1.2-litre petrol models manufactured from 2019 to 2023.

The company's remanufacturing programme for engines, gearboxes, and turbos currently covers over 90% of the UK's passenger car and light commercial vehicle (LCV) parc. By providing remanufactured alternatives to new components, the firm aims to assist workshops in reducing vehicle downtime and repair costs.
