Ivor Searle expands LCV turbocharger range

Sixteen new applications added, covering popular commercial vehicle models

Adam Tudor-Lane February 3, 2025 Comments Closed 0 likes

Ivor Searle has broadened its range of remanufactured turbochargers for light commercial vehicles (LCVs), adding 16 new applications.

The latest additions cover popular models such as the Iveco Daily, Renault Master, Vauxhall Vivaro, and Mercedes X Class. This expansion reinforces Ivor Searle's commitment to providing comprehensive coverage for the UK's LCV parc, now covering over 90% of vehicles.

Ivor Searle's remanufactured turbochargers offer a cost-effective alternative to original equipment (OE) parts, typically costing up to 40% less. All turbochargers are backed by a two-year unlimited mileage, parts, and labour warranty. The company also provides free next-day delivery within the UK mainland for orders placed before 3:30 pm.

The new additions to the LCV turbocharger range cater to various engine and model year combinations within the listed vehicles.

For more information, contact the Ivor Searle sales team at [01353 720531](tel:01353720531) or [please click here](#).
